

QuantiFERON TB Gold Plus Currently Effective

IMPORTANT: New 4 Tube Collection Kit Required

PCL Alverno is pleased to announce the new QuantiFERON-TB Gold Plus Tuberculosis assay.

The QuantiFERON-TB Gold Plus assay detects the production of interferon- γ to identify in vitro responses associated with Mycobacterium tuberculosis infection. The Gold Plus assay includes detection of CD8 T-cell responses as well as the current detection of CD4. The inclusion of CD8 T-cell response results in improved sensitivity for Latent TB Infection over the current assay.¹

- Soft Test Code:** QFTB4
- CPT Codes:** 86480
- Collection Device:** Quantiferon TB Gold Plus Pack
Item #179062
- Transport:** Room Temperature
- Stability/Handling:** Samples must be received at the Central Lab within 16 hours of collection. Please see collection manual for link to proper collection instructions.
